

Marcus Rosti

Self Evaluation

This semester I did not have a chance to present in front of the class however I think I consistently lead the discussion in my groups. Whenever we spoke together, I asked leading questions and pushed my classmates to express their views. I especially attempted to engage my group members who seemed more hesitant to speak or talk.

In class discussions, I tried to feel out what others thought and when expressing myself to the class I tried to tie what the current discussion was into what the original talk was about. I found this extremely engaging and enjoyed the talk.

I think one of my best opportunities to talk to people was outside of class, talking about the readings and current topics in data science. I love pushing people to talk about the things they care about so I tied it into what I knew they had a passion for.

Also, I noticed on the sheet I had an absence somewhere in the middle of the semester. I was not absent that day. I believe it was a day that the sheet wasn't passed around and I had to leave the second class ended for an interview. I was also late on the first day because I was speaking with Arlyn. Otherwise my attendance was consistent and timely.

My overall engagement was high I think and went beyond the classroom. I took a lot from this class and I want my classmates to do the same. For these points, I should receive full marks.
